Francisco de Assis de Souza Rodrigues

Computer Scientist · Systems Analyst · Software Engineer

AI, LLMs, Natural Language Processing, and backend engineering

PhD candidate and MSc in Computer Science (UFPE/CIn). Co-founder and engineer at **Octor**; technology advisor at NeuroEspectro; professor/coordinator at NExTI (UniFAP).

I design and operate production AI systems: LLM pipelines, typed decisions (NLI/System One), ASR (Whisper), OCR, clinical agents, and microservice APIs. Academic NLP (DeepNLPF, LREC 2020).

franciscosouzaacer@gmail.com · linkedin.com/in/rodriguesfas · github.com/rodriguesfas · rodriguesfas.github.io/en/cv

Skills

AI & NLP: LLMs (vLLM), Transformers, NLI/Laya, Whisper, OCR, RAG, text mining, information extraction

Backend: Python, Rust (Actix), FastAPI, Redis, Docker, MySQL/PostgreSQL/SQLite, AWS, Azure, OpenAPI, CI/CD, Linux

Experience

Octor — Co-founder, Computer Scientist & Software Engineer (present)

- Clinical LLM platform (Sereia): Rust + Redis + GPU (Whisper, vLLM) with clinical tools
- ASR transcription, typed-decision engine (platform-decide), Laya, WhatsApp SDR, OCR/extraction
- Microservices for scheduling, EHR, billing, and integrations

NeuroEspectro — Technology Advisor (present)

Digital health, telemedicine, EHR, and technology strategy.

NoVerde/Dotz — Backend Python (2023)

Credit APIs, tests, Ruby→Python migration, AWS Lambda/SQS/S3, Airflow, ELK.

NeuralMind — AI/NLP (2022)

NeuralSearchX: NLP search, QA, Transformers, FastAPI, AWS/Azure.

Cronos Cariri — Software (2019–2020)

Impinj RFID collector for race timing.

Education

- **PhD** Computer Science — UFPE/CIn (in progress, CAPES)
- **MSc** Computer Science — UFPE/CIn (2017–2019): DeepNLPF / LREC 2020
- **MBA** Higher Education Teaching — IDJ (2015–2016)
- **Systems Analysis** — UniLeão (2011–2014): DAVI (assistive tech)
